

How to Connect to the OET Remote Desktop Server on a MAC

Note: If you are off campus, you will need to download and install the [Cisco AnyConnect VPN from UDeploy](#) to connect to the UD network. Directions for configuring the VPN software are available on [IT's web site](#).

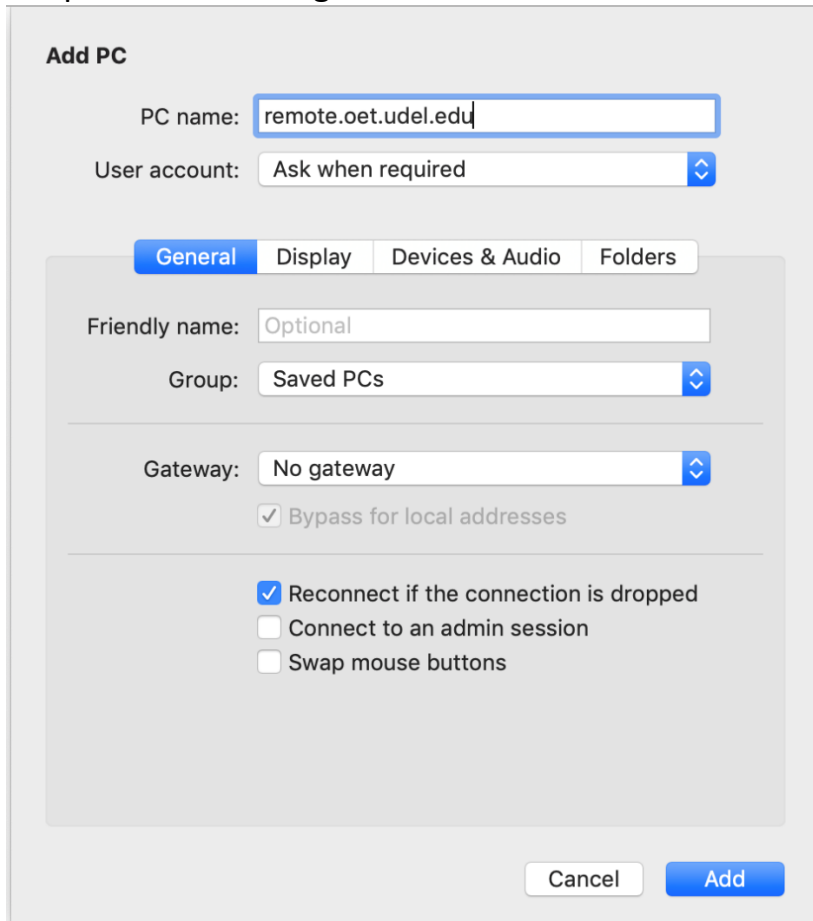

1. If you do not have the latest version of Windows App, Download and Install the Windows App from the Mac App Store.

2. Open the Windows App and click the + button in the top right-hand corner.

3. On the **Add PC** window, enter **remote.oet.udel.edu** in the **PC name** field. Keep all other setting as is and click the **Add** button.

Add PC

PC name:

User account:

General | Display | Devices & Audio | Folders

Friendly name:

Group:

Gateway:

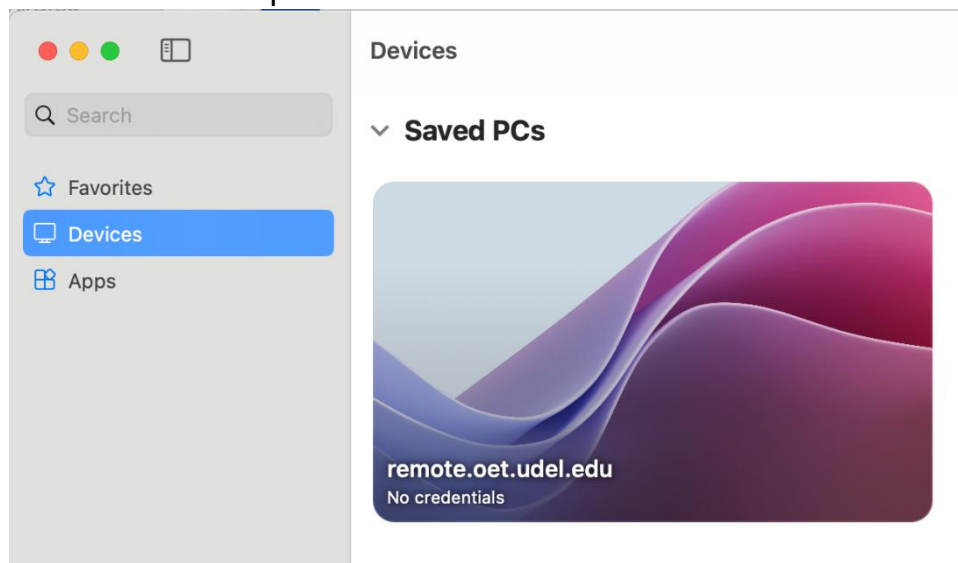

☒ Bypass for local addresses

☒ Reconnect if the connection is dropped

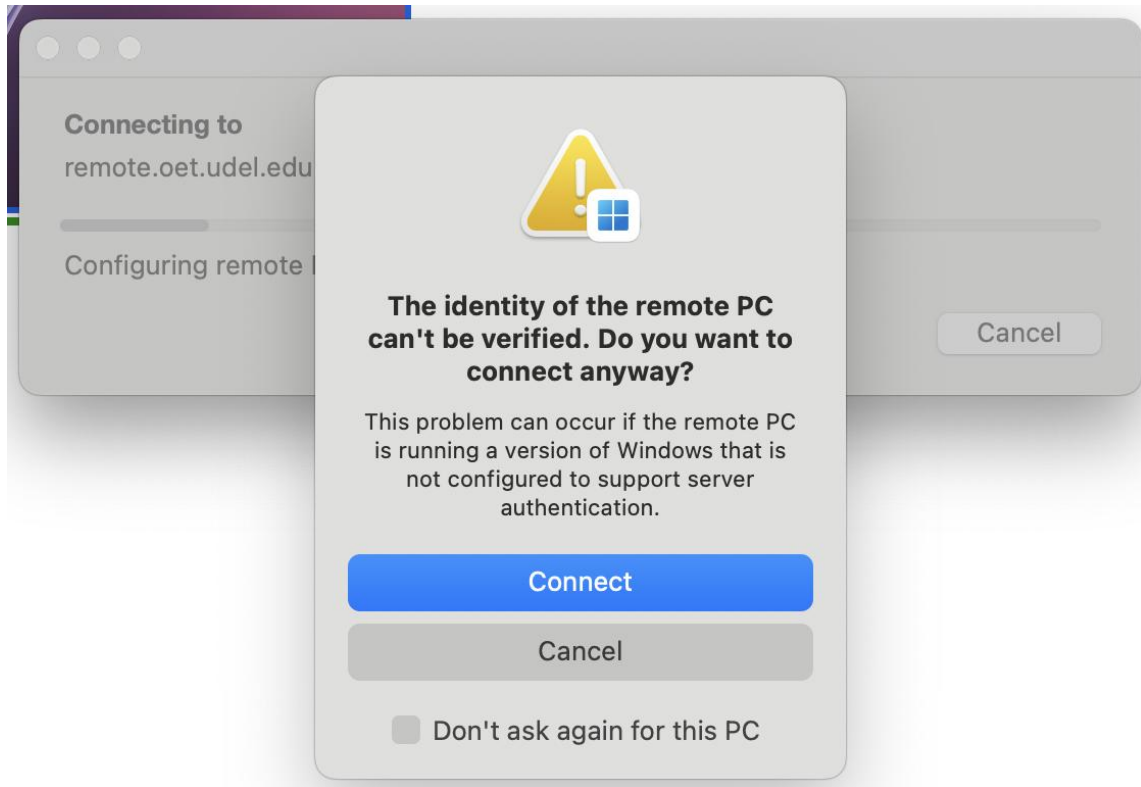

☐ Connect to an admin session

☐ Swap mouse buttons

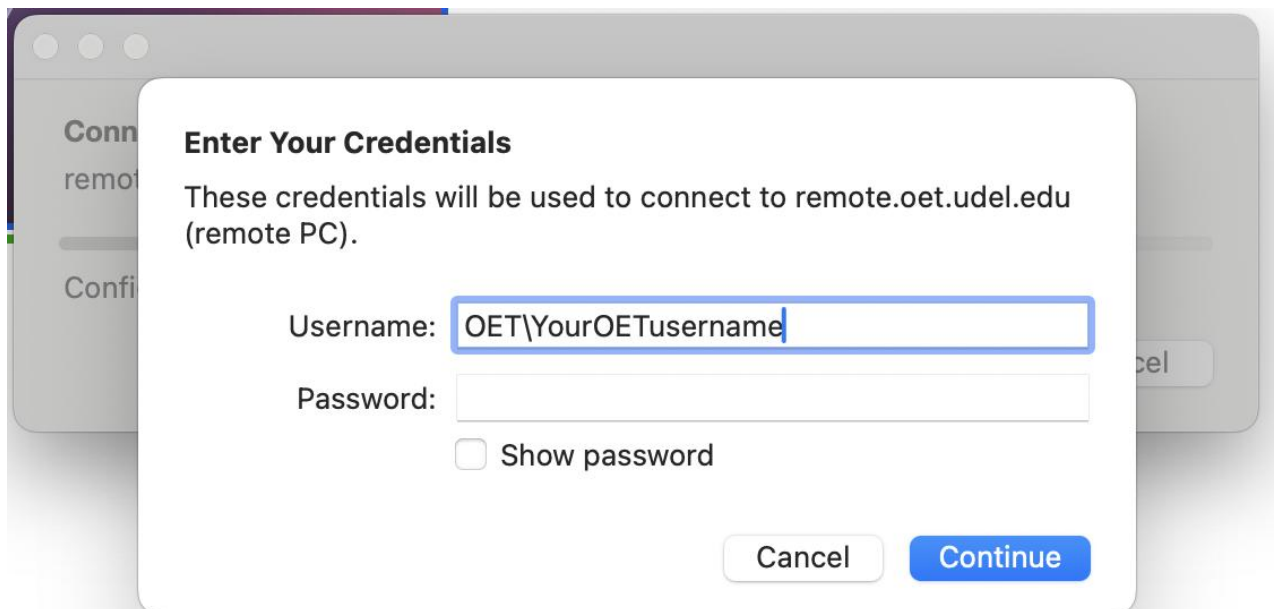

4. Got to the Devices section, make sure **remote.oet.udel.edu** is highlighted, and double click to open.

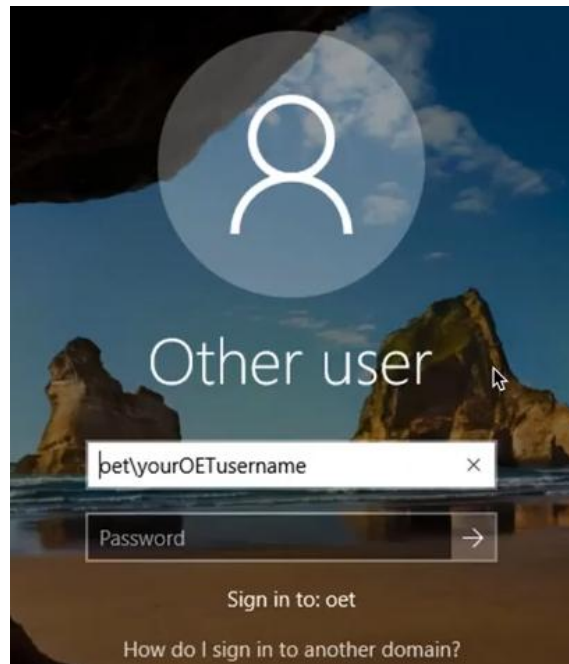

5. When you see the box below, check the box to **Don't ask again for this PC** and click on **Connect**.

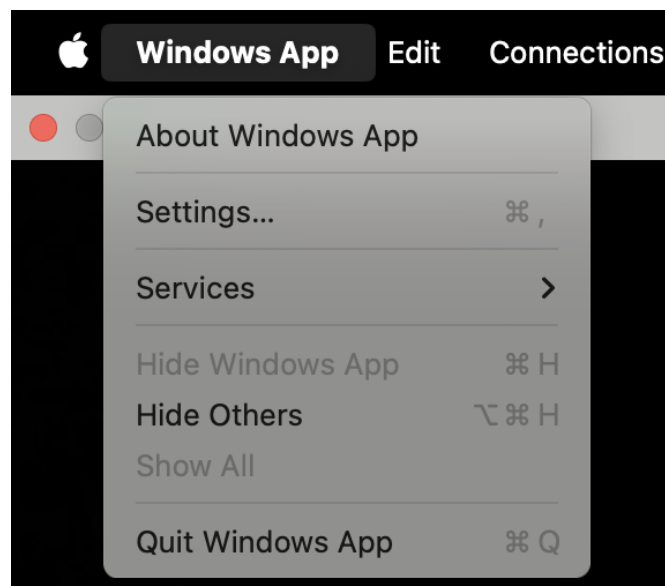

6. In the **Username Name** field, enter **OET** followed by your OET username. Then enter your password in the **Password** field.

7. Make sure your username is correct on the Windows login page that appears. Enter your password and then click the **arrow** button next to the Password field.

8. When you are ready to log out of the server, click **Windows App** in the app menu bar next to the Apple icon. Select **Quit Windows App** to exit.
